PROFESSIONAL EXPERIENCE

Seoul National University

Seoul, KR

Undergraduate Data Science Research Intern

June 2025 - August 2025

- Processed 200K+ longitudinal clinical records using MICE imputation and visit-level preprocessing to support reliable Alzheimer risk modeling.
- Built a class-reweighted DNN baseline classifier, achieving 0.89 recall and 0.72 precision for recall-first Alzheimer risk prediction.
- Improved recall by 8 percentage points with a 10-visit LSTM sequence classification model.
- Reached a 0.76 C-index by using Cox proportional hazards and Kaplan-Meier analysis to compare age-group survival differences.

Gachon University

Seoul, KR

Data Science Research Intern

June 2023 - September 2023

- Modeled diabetes risk from CDC BRFSS 2015 survey data using demographic, health, and lifestyle features for public health screening.
- Built an interpretable logistic regression baseline, achieving 0.77 recall and 0.74 precision while prioritizing model transparency.
- Improved sensitivity to 0.82 recall with an MLP classifier to better identify high-risk individuals.
- Identified high blood pressure, self-reported health, income, and education as key diabetes risk signals.

PROJECTS

Apple Health Personal Dashboard

April 2026

- Built a privacy-centered Streamlit dashboard that parses local Apple Health ZIP exports and visualizes 1,417 days of activity data.
- Normalized steps, distance, exercise, and heart-rate records into daily trend views, activity snapshots, and workout history summaries.
- Added 30-day, 90-day, and full-history import options to support refreshable personal health analytics without cloud storage.

Automated Public Health News Pipeline

February 2026 - April 2026

- Developed a Python pipeline that extracts, filters, ranks, archives, and emails 10 public health news articles every weekday.
- Improved content recency to 1–2 days old by applying time-based filtering and relevance ranking across medical and clinical research sources.
- Reduced manual monitoring to a scheduled 3-minute daily workflow using Windows Task Scheduler, logging, and time-stamped file saving.

EXTRACURRICULAR & LEADERSHIP

NYU LIKELION US

New York, NY

Member of Data Team

August 2025 - Current

- Participated in weekly SQL discussion sessions to review query strategies and compare problem-solving approaches.
- Proposed a scalable AI agentic framework to automate event coordination and attendee matching.

KISO NYU

New York, NY

Executive Member

January 2024 - Current

- Organized Korean cultural exchange events to strengthen student community engagement.
- Led a networking event with 50+ students and industry professionals to support career-oriented connections.

SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy, Seaborn, GitHub
- **Machine Learning:** Scikit-learn, PyTorch, Logistic Regression, MLP, DNN, LSTM, Time Series Analysis, Classification
- **Clinical Modeling:** MICE Imputation, Cox Models, Kaplan-Meier
- **Analytics & Tools:** Streamlit, Tableau, Power BI
- **Languages:** Korean, English

EDUCATION

New York University

Expected May 2028

Bachelor of Arts in Data Science

GPA: 3.722

- **Relevant Coursework:** Data Structures, Data Management and Analysis, Linear Algebra, Probability and Statistics, Statistics for Behavior Science
- **Programs & Awards:** Dean's Undergraduate Research Fund (26S), Presidential Honors Scholar (24F, 25S, 25F), Dean's List (24F, 25S, 25F)
- **Research Interest:** Transparency and reliability of clinical AI, with emphasis on interpretable risk prediction
- **Organizations:** Data Science Club, Grow with Google Data Analytics Program, LIKELION Data Team
